

WIRELESS DIAGRAM

for the RFOT and Therm•A•lert Series Data Loggers

● RFC1000-Repeater
Connected to a Power Outlet

● Therm•A•lert-P
Temperature Logger

It's Easy!
Start Logging in 3 Steps...

- 1 Deploy the Data Loggers
- 2 Wirelessly Start the Data Loggers
- 3 Data is instantly transmitted to a computer for real-time monitoring. If user selectable alarm ranges have been exceeded a screen alarm, e-mail, or text message will be received.

● RFOT
Meat Temperature
Data Logger

Note: The RFOT can be placed directly in an oven/smoke house.

KEY

- RFC1000 Transceiver
- ThermAlert-P
- RFC1000-Repeater
- RFOT
- Refrigerator/Freezer
- Smoker

● RFC1000 Transceiver
Connected to a USB Port
